

RHINO PALLETS

Made to Last.

Made with a soft yet rugged low density plastic, Rhino pallets are designed to last for 10+ years
Rhino Roll Pallets are used by some of the top flexible packaging companies in the world
These pallets are used for rolls up to 57" (144cm) OD, and weights up to 7,000 LBS (4000kg).
Rhino Roll Pallets are usable in both unsupported and supported rack situations

Don't take our word for it, buy one and try it!

Rotationally Molded from low density plastic, designed to last 10+ years

Rackable, Stackable, Nestable

Designed to handle rolls from 26cm to 127cm

4 Way entry

Max Load without steel 1500kg / 3300 LBS

Max Load with steel 3000 kg / 6600 LBS

*Weights are assuming storage on ground/fully supported rack

*All pallets in unsupported racking need steel

*Weight limits are general guidelines, it is always up to the customer to test the product for each specific application
